

Assignment 3

- Read a tab-delimited text file (with values below) in R and write a set of commands which can multiply each value of the vector by 5 and print the output in a new file.

1	2	3	4	5	6	7	8
1	1	7	4	5	7	5	13
4	5	7	7	4	6	12	9

- Perform a t-test and wilcox test in R on every pair of rows in the above matrix file and generate a boxplot comparing the values in the rows.
